

### VFW 1A – UNIVERSAL MILLING HEAD:

The VFW 1A Milling head is applied for light milling operations performed mainly in holes and on surfaces parallel with the main spindle centerline. No resetting of Work piece is required when using the mentioned Milling head.

The VFW 1A Milling head is capable of being swivelled about two axes perpendicular to each other to scales provided. The swivel is effected manually by means of a worm gear through transmission 0-360°. After its adjustment the head is firmly fixed to its extension mount.

<b>VFW 1A – UNIVERSAL MILLING HAED</b>	<b>Description</b>
<b>Spindle Nose</b>	ISO 50
<b>Maximum Size of Cutter</b>	125 MM
<b>Power</b>	7.5 – 10 KW
<b>Maximum Torque</b>	180 NM
<b>Speed</b>	1000 RPM
<b>Angular Adjustment</b>	Horizontal axis – 360° Vertical axis – 360°
