

VFW 2 – ANGULAR MILLING HEAD:

The VFW 2 Milling head finds its application mainly in milling operations performed in holes and on surfaces parallel with main spindle centerline. No resetting of Work piece is required when using the mentioned milling head.

The VFW 2 Milling head is capable of being swivelled to various positions to a scale. The swivel is effected by hand by means of Worm Gear through 0-360° and the head on its extension mount the required position.

VFW2 – ANGULAR MILLING HEAD	Description
Spindle Nose	ISO 50/ISO 60
Maximum Size of Cutter	250 MM
Power	22 - 37 KW
Maximum Torque	1700 NM
Speed	1000 RPM
Angular Adjustment	360°
